welcome to Bushboard

We have been developing kitchen and bathroom surfaces in the UK since 1935 and the idea that everyone deserves great design whatever their budget underpins our entire approach to surfacing.

When you buy a Bushboard product you are buying into our ethos of exceptional quality, exquisite design and excellent value and of course, first class customer care. We are proud that our surfaces are made in the UK.

We want to ensure you get the very best from your new worksurfaces so our products carry a 10 year guarantee so you can be sure your worksurface will look sensational for years to come.

inspirational innovation

Innovative and brand new, our solid laminate worksurfaces offer a 12.5mm ultra-slim design which can be shaped on-site thanks to its solid coloured core and ease of cut.

With a double-sided decorative surface incorporating fabulous designs and textures that you have come to expect from Bushboard, Evolve is even more hard wearing than a traditional laminate kitchen surface as well as being 100% waterproof.

Pictured right: Evolve Marmo Bianco 12.5mm ultra-slim breakfast bar and slab-end in ultramatt texture.

core values

The new Evolve range comprises 15 bold designs which have been matched with one of five principal, solid core colours. White, cream, light grey, dark grey and extra black.

A matched core colour means perfectly contrasting drainer grooves and machine-cut edges for undermount sinks.

Evolve surfaces have a sharp square edge profile which has been designed to give an authentic, slab like appearance.

Clean-cut and smart.

modern classics

Using the latest innovation in surface technology and design, Bushboard can now offer an ultra-contemporary ultra-slim worksurface that is incredibly versatile.

Industrial styling is on-trend, combining the look of raw materials with warmer wood decors and colourful or metallic splashbacks and accessories, creating truly charismatic interiors.

Our aesthetically dynamic collection of six 'city stones' will make a real statement in your kitchen space.

Natural Greystone ultramatt

impeccable style

With our luxury ranges you are assured stand-out style. The finest materials and manufacturing techniques guarantee products of superior quality, with edges expertly finished to the highest standards.

For up-scale designer looks, go for a slab-end. The continuation of the material on the end of a furniture run or island unit will give your kitchen a distinctive contemporary feel.

the kitchen sink

With Evolve you have the freedom to choose the sink that suits your look and your lifestyle. We have partnered with leading sink brands to give you an unrivalled selection of styles and materials.

Stainless steel and granite undermount sinks

Recognising the wide appeal of stainless steel and granite, we offer an extensive choice of jigs for all the leading brand names:

	single bowl	one and a half bowl
Astracast	Onyx 4034	Edge D1
Astracast		Opal S3
Blanco		Supreme 533U
Carron Phoenix	Deca 100	Deca 150
Carron Phoenix		LV100U
Carron Phoenix (granite)	Fiji 100	Fiji 150
Franke	ARX110 35	ARX160
Pyramis		100091430
Rangemaster		UB3515 LH/RH
Reginox		RF302S
Tuscan	Premium medium sink	Premium 1.5 bowl sink
Tuscan	Square medium sink	Square 1.5 bowl sink

To install a stainless steel or granite undermount sink you will need:

- Reusable sink jig for your chosen model
- Reusable drainer jig
- Evolve sink clip set from the Installation kit
- BB Complete 290ml cartridge (see page 53 for colours)

BB Complete adhesive

BB Complete must only be used for the following:

- Undermounting stainless steel and granite sinks
- Installing Belfast & butler sinks
- Adhering splashbacks and upstands
- Sealing all joints

Belfast and butler sinks

Belfast and butler sinks can be used with Evolve surfaces.

Pictured detail: Evolve Luna breakfast bar in touch texture, image shows undermount sink with exposed white core.

Finishing kit

Use one for every installation. Includes finishing materials for edges and sink installation clips - pack of 12 to install one undermount sink. Does not include adhesives.

BB Complete

Use to joint, bond and seal worksurfaces, upstands and splashbacks and install certain types of sinks.

Jigs

Sink jigs - See page 20 for details.

Drainer groove jig - Use to cut horizontal 3mm deep grooves for draining areas. (See pages 19 & 21)

Radius jigs - Use to cut radius ends 230mm, 300mm, 400mm and 450mm.

Installer training

Bushboard offers free training courses for professional installers in all aspects of Evolve installation ensuring the installer can produce a first-class finish.

Installation instructions are also supplied in every Evolve surface and must be read prior to commencing any installation. Copies are available on the website.

rest assured

At Bushboard we're passionate about everything we do and we're always here to help.

We invest heavily in high quality manufacturing and work with the best materials and suppliers. Our values of partnership, loyalty and an ethical approach mean we do what's right; that's why we've been around since the 1930s.

Even after Bushboard products arrive in your home we strive to assure a quality installation. Our BB Complete adhesive and sealant range is designed to make the installer's life easier and assure a quality long-lasting installation for you.

Quality

Manufacturing with the finest materials is what gives Bushboard worksurfaces their signature quality. While beautiful and stylish to look at, they are also constructed to cope with the wear and tear of everyday living. Your Bushboard worksurface is designed to withstand knocks, abrasions, chemicals, cigarette burns, steam, stains from juice, tea, wine or coffee. It is also highly resistant to heat, although we recommend the use of a protective pad as saucepan bottoms can become extremely hot. And it is really important that spills are mopped up immediately to reduce unnecessary damage.

Evolve surfaces offer excellent machining capability for sink cut-outs and mitre joints.

Care & Maintenance

Bushboard worksurfaces are so easy to maintain. On a day-to-day basis all you need to do is wipe them down with a moist cloth and your favourite mild detergent. For more stubborn marks such as fruit juice and coffee, leave the detergent to soak on the surface for a little while before rinsing thoroughly. Obviously, your worksurface can become damaged if mistreated, so we recommend some sensible measures like placing hot pans or casserole dishes on protective mats and mopping up spills quickly. As with any laminate worksurface, you should avoid chopping, cutting or placing hot items directly on to the surface.

10 year Guarantee

Your Evolve worksurface has a 10 year guarantee. Bushboard will make good by repair and/or replacement (at its discretion) any Evolve product of its manufacture which can be shown to have

failed by reason of defects in its manufacture, subject to fair wear and tear, provided the product has been installed and used in accordance with the manufacturer's instructions and that the products are used for their intended purpose and application.

Proof of date and place of purchase required. This guarantee is in addition to your statutory rights as a consumer and does not affect your rights in any way.

Choosing an Installer

Any experienced kitchen fitter will easily take to Evolve designer surfaces. No specialist cutting tools are required.

welcome to acrylic

Adding a splashback to your scheme is an excellent way to achieve a fast refurbishment.

As well as a multitude of laminate splashbacks, Bushboard are now offering acrylic splashbacks in a choice of eight stylish colours to help you achieve a sleek and professional looking finish.

welcome to encore

Make an elegant statement with our original, luxurious Encore surfaces.

Mountain Haze, Ice and Mocha Stone are distinctive designs with large scale natural figuring that mirror the strata of granite and marble. They are inspired by nature, whilst incorporating the functional qualities of solid surface. And they will work with any kitchen style from classic to contemporary.

All three are available in slimline 27mm thickness and at a large size of 1200 x 2400mm so you can have that impressive island unit you've always wanted.

Pictured right: Encore Mountain Haze island and slab-end. Shown with an Encore one and a half bowl white acrylic moulded sink and drainer grooves.

BB encore

BB encore

so flexible

Solid surfacing offers you the design flexibility to create the kitchen you want.

From island units with slab-ends to integral sinks and drainer grooves, the material flows seamlessly around joints, shapes, edges and corners.

This uninterrupted flow of material is visually enhanced with the creation of inconspicuous seams in all but the new marbled designs, where the directional pattern accentuates a more natural feel.

Whatever your design choice, there's nothing but a smooth and stylish worksurface for you to enjoy.

Pictured detail: Encore Mountain Haze slimline worksurface showing the directional nature of a marbled corner joint.

BB encore

sinks with style

For the ultimate in streamlined looks, go for an integral sink with precision-machined drainer grooves. The seamless flow between the moulded bowl and the worksurface shows off the true aesthetics of solid surfacing at its very best. Not forgetting that it's a superbly practical material that's both durable and easy to clean.

Smooth to the touch and totally integrated, the 100% solid surface material is durable, hygienic and non-porous. The sinks are reinforced and suitable for use with waste disposal units. Elegantly designed, the choice of single and one and a half bowl sinks are stylish whilst being practical enough to cope with a hard working kitchen.

Pouring boiling liquids directly into an Encore sink without running cold water at the same time may damage the material. If you have an instant boiling water tap, a container should always be used to collect the water to prevent damage to the surface in and around the sink.

Pictured right: Encore Glacier breakfast bar. Shown with an Encore one and a half bowl white acrylic moulded sink and drainer grooves.

BB encore

perfect sink space

With Encore you have the freedom to choose the sink that suits your look and your lifestyle. We have partnered with leading sink brands to give you an unrivalled selection of styles and materials.

Encore seamless sinks

Encore pure white moulded acrylic sinks offer a seamless flow with the worksurface. Smooth to the touch and totally integrated, the material is durable, hygienic and non-porous. They are reinforced and suitable for use with waste disposal units. Available in single bowl and one and a half bowl options.

To install a moulded acrylic sink you will need:

- Reusable acrylic sink jig set. This contains jigs for both sink models and a sink profiling cutter. The cutter will profile up to 6 sink installations.
- Reusable drainer jig
- Encore colour-matched sink adhesive in the worksurface colour
- Encore sink clip set

To install a stainless steel or granite undermount sink you will need:

- Reusable sink jig for your chosen model
- Reusable drainer jig
- Encore sink clip set
- BB Complete 290ml cartridge (see page 53 for colours)

BB Complete adhesive

BB Complete must only be used for the following:

- Undermounting stainless steel and granite sinks
- Bonding and seaming upstands and splashbacks
- Installation of overlapping type slab ends

It must not be used to joint Encore worksurfaces, apply edge strips, bond Encore acrylic sinks nor for mitred slab-ends. For these applications use only Encore colour-matched adhesive.

Belfast, butler and ceramic undermount sinks

Do not install Encore with Belfast, butler or ceramic undermount sinks. You may however install standard inset ceramic sinks.

BB encore

Encore Espresso Glass breakfast bar.
Shown with a Franke ARX160 undermount sink and drainer grooves.

installation made easy

Easy installation

By applying our knowledge and expertise in worksurface manufacturing Encore really does re-interpret solid surfacing for today's kitchens. We have developed a product requiring the same jointing techniques as conventional laminate worksurfaces. The surface is pre-sanded to a 320 grit finish, which will be further sanded and finished on site by your installer to give a lovely semi-matt appearance. Corner joints are the real strength of Encore. The finished joint is seamless and very, very hygienic – you'll even forget it's there.

Installation kits & adhesives

Installation kit

For every installation the installer must use an Encore Installation kit, which includes all cleaning, sanding and finishing materials, together with our Encore colour-matched adhesives. Adhesives are not included but are available in individual cartridges which can be purchased separately.

Encore colour-matched adhesive

Encore colour-matched adhesive is used for seamless joints, edge strips and for Encore acrylic sinks. The adhesive is supplied in 50ml cartridges and requires a reusable mixer gun which is available from your supplier. We recommend the following usage guidelines:

One 50ml cartridge per 2 joints

One 50ml cartridge per 2 x 650mm edge strips

One 50ml cartridge per radius end

One 50ml cartridge per slab end where a mitred, seamless joint is required

One 50ml cartridge per single bowl Encore acrylic sink. (Use the colour-match for the worksurface)

One and a half 50ml cartridges per one and a half bowl Encore acrylic undermount sink. (Use the colour-match for the worksurface)

BB Complete adhesive

BB Complete adhesive must only be used for the following:

- Undermounting stainless steel and granite sinks
- Bonding and seaming upstands and splashbacks
- Installation of overlapping type slab ends

It must not be used to joint Encore worksurfaces, apply edge strips, bond Encore acrylic sinks nor for mitred slab-ends. For these applications use only Encore colour-matched adhesive.

Installers also need

Reusable radius jig

Use to cut radius ends 230mm, 300mm, 400mm and 450mm.

Reusable sink jigs

See page 40 for details.

Reusable drainer jig

Use to cut horizontal 2mm deep grooves for draining areas. (See pages 33 & 39)

Sink installation clips

Pack of 12 to install one undermount sink.

Jigs for radius curved ends

These are required to create curved worktops with our 1350mm thin edging strip for curved corners or island units. We supply a radius jig which is suitable for 230mm, 300mm, 400mm and 450mm radii. 230mm is the smallest curve achievable using an Encore radius edging strip.

A reusable sink jig set suitable for both Encore sink models including a blending cutter.

Replacement cutters are also available.

made to last

Quality

Manufacturing with the finest materials is what gives Bushboard worksurfaces their signature quality. Whilst beautiful and stylish to look at, they are also constructed to cope with the wear and tear of everyday living.

Encore features a thicker than average 5mm surface layer that delivers premium performance and surface appearance. The compression moulded reinforced modified acrylic gives it some extremely high performance characteristics unique to Encore over comparative materials.

Testing by FIRA (Furniture Industry Research Association) shows that Encore can tolerate heat in excess of 240°C. However we do recommend the use of protective pads when placing hot pans or casserole dishes on your worksurface and the use of chopping boards when preparing food, as dark colours have a tendency to show marks and scratches more readily. A significant benefit of the material is that scratches can be polished out to renew your worksurface back to its original finish.

Encore is five times more impact resistant than other solid surface products, so can cope with the busiest kitchen. And because the surface layer is reinforced, installation is easy for the installer and longer lasting for the home owner. Independently tested by FIRA, your Encore worksurface is designed to withstand everyday knocks, spills and stains.

10 year Guarantee

Your Encore worksurface has a 10 year guarantee. Bushboard will make good by repair and/or replacement (at its discretion) any Encore product of its

manufacture which can be shown to have failed by reason of defects in its manufacture, subject to fair wear and tear, provided the product has been installed and used in accordance with the manufacturer's instructions and that the products are used for their intended purpose and application. Proof of date and place of purchase required. This guarantee is in addition to your statutory rights as a consumer and does not affect your rights in any way.

Choosing an Installer

Whilst Encore is simple to install, it is not a DIY product and should always be supplied and fitted by your local kitchen specialist and experienced installer. As not all solid surface products are the same, to be assured of a professional finish, we recommend that the installer has attended one of our free Encore training courses. Please ask your kitchen showroom about this.

Care & Maintenance

Your Encore worksurface is developed to cope with every day wear and tear from crockery and utensils. And whilst it is highly impact and heat resistant, your worksurface can become damaged if mistreated, so we recommend some sensible measures like placing hot pans or casserole dishes on protective mats, mopping up spills quickly and not chopping directly onto it.

A major benefit of Encore is its ability to be repaired or refinished. Minor scratches, which can be more apparent with darker colours, can be removed by using the Scotch-Brite pad provided in our After Care kit. In the unlikely event of more significant damage, we suggest using an Encore installer who is able to repair and refinish your surfaces.

In general day-to-day usage, keeping your surface as good as new requires little more than normal cleaning with a mild detergent and water. Then rinse with clean water and buff gently dry. To maintain your Encore surfaces our After Care kit is available from your retailer or can be ordered directly from Bushboard.

For full details refer to our After Care Leaflet provided with every Encore worksurface.

They can also be found on our website at www.bushboard.co.uk

peace of mind

BB complete

We know the importance of the final installation, that's why we've developed BB Complete, our bespoke adhesive and sealant which should be used by your installer when your worksurface is fitted.

It offers superb performance at modest cost and allows your installer to joint, bond and seal your worksurface, upstand and splashback and install certain sink types.

The wide choice of colours available will give you the perfect colour co-ordinated result.

Always use BB Complete for peace of mind.

Our Customer Support Team can offer advice on installing and looking after your worksurface. Our Installation, Care & Maintenance leaflet is included in every worksurface and is also available from our website.

Sampling

Every year thousands of customers use our sampling service to help them plan their kitchen worksurface scheme.

Your retailer can request these for you or you can order them directly by visiting our website.

In fact, to make it really easy, we will send you up to six of your favourite designs, free of charge, delivered direct to your door.

Our Retail Partners

We have thousands of retail partners who will be happy to help you with your new kitchen plans, give you advice and enable you to explore the full range of samples.

Simply enter your postcode into our 'Find a retailer' search on our website to find those nearest to you.
