

### Quadra & Cubix design collection

Duropal worktops are the perfect alternative to acrylic based, granite and stone worktops at a fraction of the price.

61 exciting decors – 49 in the popular Quadra profile and 12 in the unique Cubix profile.

#### Profiles

#### Surface textures

##### XTreme Matt

XTreme Matt has a convincingly impressive look with a previously unknown, enormous colour transparency and depth – and a pleasantly warm, velvety soft touch.

##### Enhanced Semi Matt

This surface is distinguished by its pleasantly natural feel.

##### Enhanced High Gloss

A fashionable yet enhanced performance gloss finish designed to both complement the effect of the decor and provide improved abrasion resistance.

##### Fine Grain

A fine texture and evokes an association with ceramics and stoneware. Wood becomes tangible, gets a softer feel and a natural impression.

##### Top Face

Universally applicable neutral and ideal surface. Top Face is classic for worktops as this surface is particularly resistant to fingerprints.

##### Top Velvet

Elegantly matt, smooth and fine structure, sensitive design. Recommended for horizontal and vertical applications.

##### Crisp Granite

A surface texture especially suitable for stone reproduction decors whilst offering both the feel and optical effect of a natural stone surface.

##### Montana

Generous, deep wood structure particularly suited to expressive hardwoods and softwoods.

##### Stucotex

The craftsmanship of the material is emphasised by the matt, rough feel caused by a subtle brush stroke, which gains depth by the glossiness.

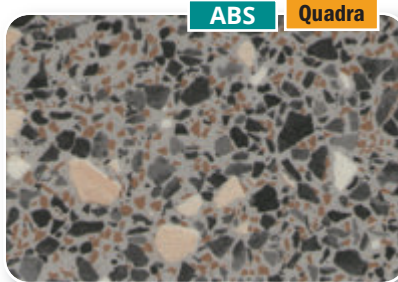

##### Natural Wood

Naturalness and precision characterise this delicate wood structure.

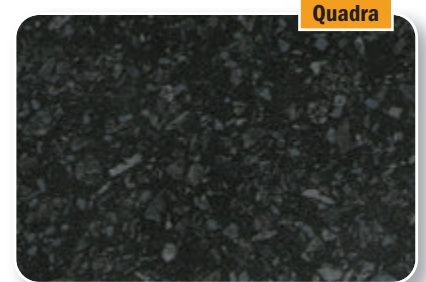

##### Rustic Wood

Looks and feels like brushed wood with a gloss-matt effect.
