About Apollo Compact Worktops

Apollo® Compact is a solid grade, load bearing laminate, it has inner core of celluloid fibres impregnated with thermosetting resins, resistant to atmospheric & chemical agents as well as moisture, humidity, foodstuffs and most domestic cleaning chemicals . It provides superior mechanical properties to impact and wear resistance. It can be used for both horizontal and vertical surfaces.

Apollo® Compact is manufactured in 12.5mm thickness, which is adequate enough to eliminate the use of a substrate, and is useful where flat and free standing panels are required for decorative purposes. Apollo® SGL can also used for furniture, partitions, cubicles, panelling, transportation vehicles and areas with higher cleaning and hygiene requirements.

- Modular blanks product only
- Worktops are available in a choice of colours
- Solid 12.5mm, non-porous surface
- Difficult to stain worktops
- Easy to clean & maintain
- 10 Year Manufacturer's Limited Warranty
- Install worktops yourself
